

Accounting Management Model

6-Week Implementation Plan

Objective

Design and implement a structured accounting system to manage business operations including purchases, expenses, banking, reporting, and document storage.

The system will ensure:

- Centralized financial data management
 - Vendor and expense tracking
 - Purchase and billing workflows
 - Bank transaction management
 - Financial reporting (P&L, summaries)
 - Organized document storage
-

Core System Flow

CREATE → TRACK → PROCESS → RECORD → REPORT → STORE

Meaning:

- Create items, vendors, and purchase records
 - Track expenses and transactions
 - Process bills and payments
 - Record financial data
 - Generate reports
 - Store documents securely
-

Week 1 — Core Architecture & Setup

Focus

Establish backend structure, database, and base system

Tasks

Database Design

Core collections:

- Items
- Vendors
- Expenses
- Purchase Orders
- Bills
- Payments
- Bank Accounts
- Transactions
- Documents

Backend Setup

- Project architecture setup
- API structure initialization
- Authentication integration (if needed)

Basic CRUD APIs

- Items
 - Vendors
-

Deliverables

- Database schema
 - Backend structure
 - Initial APIs (Items & Vendors)
-

Week 2 — Items & Vendors Module

Focus

Build product and vendor management system

Tasks

Items Module

- Add/Edit/Delete items
- Item listing
- Basic validation

Vendors Module

- Vendor creation
- Contact details
- Vendor listing

UI Development

- Forms + listing pages
-

Deliverables

- Fully functional Items module
 - Vendor management system
 - UI screens for both
-

Week 3 — Expenses & Bills Module

Focus

Track business expenses and vendor bills

Tasks

Expenses Module

- Add expenses
- Categorization
- Date & amount tracking

Bills Module

- Create vendor bills
- Link bills to vendors
- Status tracking (paid/unpaid)

Validation & Logic

- Data consistency checks
-

Deliverables

- Expense tracking system
 - Bill management system
 - Vendor linkage
-

Week 4 — Purchase Orders & Payments

Focus

Handle purchase flow and payment tracking

Tasks

Purchase Orders

- Create purchase orders
- Link with vendors
- Status tracking

Payments Module

- Record payments
 - Link payments to bills
 - Payment history
-

Deliverables

- Purchase order system
 - Payment tracking system
 - Bill-payment linkage
-

Week 5 — Banking Module

Focus

Manage financial transactions and accounts

Tasks

Bank Accounts

- Add/manage accounts

Transactions

- Manual transaction entry
- Credit/Debit tracking

Reconciliation (Basic)

- Match transactions with payments
-

Deliverables

- Banking system
 - Transaction management
 - Basic reconciliation
-

Week 6 — Reports & Documents

Focus

Generate insights and manage files

Tasks

Reports

- Profit & Loss
- Expense reports
- Summary dashboards

Documents

- File upload system
 - Link documents to records
-

Deliverables

- Reporting system
- Document storage system
